EDUCATION **Honors B.S. in Computer Science** May 2020
University of Delaware, Newark, Delaware
Concentration: Artificial Intelligence and Machine Learning
GPA: 3.92
Minors: Electrical & Computer Engineering, Physics, Mathematics

RECOGNITION **University of Delaware**
Dean's List Fall 2016 – Spring 2019
Steven Geracimos Memorial Award 2018
A monetary award to an outstanding computer science major who has demonstrated both interest and aptitude for the subject as characterized by Steven Geracimos.
General Honors Award 2018
Recognizes a student's pursuit of Honors challenges and enrichment opportunities during the first two years of university study
Trustee Scholarship 2016

RESEARCH INTERESTS Computer Science Education, Digital Education, Data-Driven Instructional Design, Educational Data Mining, Academic Motivation, Self-Efficacy in Computer Science, Data Literacy, Non-Traditional Education, Quantum Computing Education, Sound & Music Computing

RESEARCH PROJECTS **Investigating Data-Driven Course Design** Aug 2019 – Present
Supervisor: Dr. Austin Bart
Studying student learning outcomes in introductory computing courses and the effectiveness of data-driven course design via analyzing programming assignment snapshots.

- Performed exploratory data analysis on ProgSnap2 programming snapshot data.
- Developing a general pipeline to process, analyze, and visualize the ProgSnap2 data towards an end goal of generated end-of-year reports to emphasize key learning objectives.

Computational Thinking in Music Jun 2017 – Present
Supervisors: Dr. Lori Pollock and Dr. Jennifer Shafer
A general education course to teach basic computational thinking (CT) principles as a response to to NSF's call for "computer science for all students". This course naturally aligns CT principles (data, decomposition, algorithms, abstraction) with music theory topics for an authentic learning experience.

- Posed ideas for CT modules, and provided feasibility estimates on whether specific computational exercises were right for learners' skill levels.
- Designed a Python module for the students to use during assignments.
- Served as a TA for the class and helped explain common computational misconceptions.

Vertically Integrated Projects May 2017 – Jul 2018
Supervisors: Various
Took part in various semester-long opportunities for exploring undergraduate research topics such as: virtual reality, cloud computing, high performance computing, and grid-integrated vehicles.

PUBLICATIONS **Posters**
J. Shafer, **J. Skripchuk**. Computational Thinking in Music: A Data-Driven General Education STEAM Course. SIGCSE '20. Portland, OR. March 11-14, 2020.

**TEACHING
EXPERIENCE****University of Delaware**
Teaching Assistant

Courses:

CISC108 - Introduction to Computer Science I

Fall 2019

CISC320 - Introduction to Algorithms

Spring 2020

**INDUSTRY
EXPERIENCE****JPMorgan Chase & Co.**
Software Engineer Intern

- Corporate Finance Sector Jun 2019 – Aug 2019
 - Developed a machine learning model for a natural language interface to business intelligence databases. The model constructed natural language responses from the natural language queries, and would also return data and figures predicted to be related to the user’s search.
 - Designed and prototyped an internal notebook style web application that interfaced with the machine learning model. Applied HCI principles based on iterated feedback from real clients.
 - Infrastructure Sector Jun 2018 – Jun 2019
 - Maintained large cross-platform virtual machine network and switched IT automation configuration managers to an open-source alternative, promoting a continuous integration pipeline.
 - Designed various Splunk dashboards for real-time analytics of network health and security status.
-

**PROFESSIONAL
AFFILIATIONS****Phi Kappa Phi**
*Honor Society*Member Since 2019

**CAMPUS
ACTIVITIES****Association for Computing Machinery**, University of Delaware
PR Manager

Aug 2018 – Present

- Organized meeting contents and contacted professors for potential talks.
 - Organized the first “CS Freshman Social” in an effort to increase community in the UD Computer Science Department, which had a large turnout of over 40 people.
-

**VOLUNTEER
WORK****Newark Charter Middle School**
First Lego League Robotics Coach

2015 – Present

- Coach a small team of seven middle-school students in nationwide robotics competition
 - Mentor scientific thinking and engineering skills through mentoring practical project design and small robot construction
 - Won “Best Project” in 2019 state championships
-

SKILLSPython, PyTorch, Java, C, C/C++, ARM, HTML, JavaScript, SQL, \LaTeX
